

Morbark was on hand at the Papé exhibit area with its 63,500-lb., 50/48 drum chipper. It's the largest in Morbark's full line of chippers and a product of a half-century of refinement and expertise in whole tree chipping.

Morbark recently introduced its new Advantage 3 high-performance chipping drum. It significantly improves chip quality in large volume wood chipping equipment, while reducing recurring wear part and maintenance costs by approx. 70%. The new pocket, knife and knife-holding assembly includes increased clamping force and more durable knives for increased sharpenings before replacement. The Advantage 3 drum can be ordered as a retrofit to any existing Morbark drum chipper. www.morbark.com 1-800-831-0042

White Mountain Chain of Bonners Ferry, ID, is the largest importer of the Trygg line in the United States. It carries a vast array of tire chains for pick ups, loaders, motor graders, skidders and just about anything with a rubber tire. Depending on what the application is and what your needs are, White Mountain Chain will work with you to recommend the most economical chain for your application. Now that you have played with the rest, get the best. Call Ed at 800-439-9073 or visit www.whitemountainchain.com

John Deere Construction & Forestry had on display, at Papé Machinery's exhibit, some of its toughest and most productive equipment, including: the 1270E Harvester and 1910E Forwarder, with stronger frames and rotating and leveling cabs; the 848H Skidder, featuring an exclusive lock-up torque converter for improved fuel efficiency and productivity; the 2154D Log Loader, with powerful swing and hydraulic systems and improved horsepower; the 959K Tracked Feller Buncher, with all-terrain strength and ability to climb over rocks, stumps and logs; and a HTH623C Waratah Built To Work Harvester. www.JohnDeere.com

Oregon based Peterson Pacific Corporation was proud to attend the 2011. OLC. Peterson had a new display area and were doing live demos during the entire show showcasing their 2700C Horizontal Grinder and the new 4310 Drum Chipper. In addition to the live demo machines, Peterson had a 5000H whole tree chipper, a 4700B horizontal grinder, and the 4300 drum chipper.

The live demonstrations of the 4310 Drum Chipper were particularly popular this year. To demonstrate their capabilities to produce microchips, the 4310 was equipped with a 12-pocket drum to produce a consistent 1/4» minus chips and a top loading flexible chip spout that rotates 180-degrees to assist with trailer loading on tight landings.

To find out more about Peterson products, call 800.269.6520 or www.petersoncorp.com

QUADCO gave loggers a chance to view the full line of their products at the OLC. This included: high speed felling heads, Intermittent felling heads, Keto harvester/processor heads and the new QUADCO Brush Mowers. On display were the new Mower and Grinder Teeth, along with all the rotatable saw teeth. QUADCO also supplies bogie tracks, rotators and saw head replacement parts. www.quadco.com

Cat® dealer Peterson Machinery Co. showcased the new Cat® 568 Forest Machine along with seven other Cat machines at the OLC. Highlights of the 568 include a 12 percent increase in horsepower over the previous model, more efficient hydraulics, longer track frames for more stability, and ground-level accessibility for maintenance. Other machines showcased include the Cat 532 track feller buncher, 320D Forest Machine, 527 track skidder, 950H wheel loader, 259B compact track loader, and the D7E and D8T track type tractors. In addition to showing customers the latest Cat products, Caterpillar representative Mary Roethler led Tier 4 technology training for credits towards Professional Logger's Certification to approximately 200 attendees. www.cat.com

Tremzac's OxTrac hydrostatic skidder/forwarder attracted a lot of attention inside Triad's tent during this year's OLC. The manufacturer has just introduced a multi function remote controlled winch option for the versatile OxTrac. These functions include engage/disengage, throttle control, emergency stop, winch in/out.

In addition to the remote winch, Tremzac is introducing a new model called the OxTrac Fire, specifically designed for firefighting in remote locations. This machine includes a 55-gallon fire fighting drop tank and brush cutting blade, as well as a winch. This light and compact machine is designed to be helicoptered in with wildland fire rapid attack crews. The light footprint Oxtrac Fire is the ideal firefighting tool for the coming fire season. www.tremzac.com

KOLLER NORTH AMERICA

www.KollerNA.com

Koller North America brought the compact K301T to the OLC. PTO-powered and designed for 3-point hitch tractor mounting, the K301T is ideal for thinning, woodlot management and small diameter wood harvesting. The K301T is the company's smallest yarder — the two others include the K501 and the track-mounted K702 tower yarder. The K702 sets up quickly and is economical to both operate and maintain, offering 360-degree logging capability and line speeds of up to 2160 ft./min. The Cummins-powered yarder is also extremely productive in thinning and final felling applications. www.KollerNA.com
